CHECKED IN LUGGAGE MAZE

COLOR IN YOUR MAZE AND GET READY TO PLAY! START AT THE CHECK-IN COUNTER AND GUIDE YOUR LUGGAGE ALL THE WAY TO YOUR AIRPLANE.

Fun Fact: Did you know that once you drop your luggage off with our Customer Service Agents at our Check-In counters, your bags then go through a conveyor belt system? The conveyor belt leads your bags to our Fleet Service Clerks. When they receive your bags, they then load them into the belly of the plane. In some of our larger airports, our conveyor belts can sometimes be miles long!

A LITTLE BIT OF MECHANIC HUMOR

Fun Facts:

Aircraft Maintenance Technicians (otherwise known as AMTs or Aircraft Mechanics) are highly skilled and have a special license to be able to work on airplanes.

Their typical "office" can be a hangar, an airport ramp or the inside of an airplane.
